

ALTUR GREEN LINE is a complete range of products for the care of your agricultural vehicle. With these products, you can keep it looking new and shiny like as if just bought, with the maximum respect for the environment.

ECOLOGICAL

NANO POLYMERS

**DIRECTIONS FOR USE:
SHAKE WELL BEFORE USE.**

1. Wash the vehicle to be treated accurately with one of the 2 proposed detergents, according to the amount of dirt to be cleaned;
2. After rinsing the detergents, wait for the surface to dry in order to prepare them for the perfect adhesion of SCHUTZ BARRIERE;
3. Pre-dilute the product to 50% with water;
4. Spray it uniformly with a nebulizer; use the product undiluted in case of application to a wet vehicle.
5. Wait for the products to dry (around 5 minutes in direct sunlight) before exposing the surface to the treatments;
6. At the end of the working day, it is recommended to wash the vehicle to remove all the contaminating agents as well as the protection film. This can be done with the help of the TRAKTOR WASH cleaner or simply with a high-pressure water jet. It is very important to prepare the vehicle before a new application of SCHUTZ BARRIERE.

SCHUTZ BARRIERE contains polishing nano polymers that protect the surfaces and make them shiny.

This product is totally free from mineral oils, solvents, surfactants and hydrocarbons.

PROTECTIVE SHIELD FOR AGRICULTURAL MACHINERY

Today, hydrocarbon-based substances are widely used to protect the surfaces of agricultural machinery from the aggression and contamination of copper sulfates, fungicides and substances sprayed in order to protect the crops. These hydrocarbons are dangerous for the environment, for the users and, after some time, they can also damage the paint of the machineries. Now you can use SCHUTZ BARRIERE, an environmentally-friendly product developed by the ALTUR laboratory.

The protection of your agricultural machinery can now be entrusted to an innovative product that does not feature any type of dangerous symbols in its label. It is completely bio-degradable and easy to use.

SCHUTZ BARRIERE is easy to use and dries quickly when exposed to direct sunlight. It creates an elastic barrier that is ideal for a long-lasting and effective protection against contamination from various chemicals, such as copper sulfate, wettable powders, fungicides, etc. It perfectly insulates all the parts of the tractor and the machinery that are exposed to contamination, e.g. hard surfaces, plastic, painted surfaces, ABS, rubber, tires, polycarbonate, glass, mechanical parts, zinc-plated surfaces, etc.

The application of SCHUTZ BARRIERE can be done anywhere with the help of a nebulizer and it lasts until its removal, which can be done with a high-pressure water jet. It is recommended to restore the protection every day by removing it and re-applying it in order to get the maximum protection.

After rinsing the vehicle, it will look even shinier thanks to the special polishing nano-tech agent contained in SCHUTZ BARRIERE.

TRAKTOR EXTRA

TRAKTOR WASH

SULFATE REMOVER

A detergent for the removal of the blueish residues left by copper sulfate from all agricultural machinery. Dilute to 10-20% with water and apply with a sprayer.

CLEANER FOR GRAPE HARVESTERS & MULTIPURPOSE DEGREASER

A cleaner for grape harvesters and a universal degreaser all in one. This product specifically targets organic dirt caused by sugary and tannic residues and removes it from all agricultural machinery as well as the equipment used for grape harvesting. For grape harvesters, apply the product as is with a sprayer and a cleaning brush. In order to use it as a multipurpose degreaser, dilute the product to 5-30% with water according to the type of application and the level of dirt to be removed.

INTENSIVE CLEANER

An active foam detergent for the intensive cleaning and degreasing of agricultural machineries and vehicles. It quickly and effectively removes any kind of dirt. Formula with a special rinse agent that improves the brilliance of the finish and reduces water spots on the windows. This product is ideal for the cleaning of the vehicles in preparation for the treatment with SCHUTZ BARRIERE. Formulated with highly biodegradable materials. Dilute the product to 2-5% with water and apply with a sprayer.

MAINTENANCE CLEANER FOR FREQUENT WASHES

An active detergent for the cleaning of the exterior of all agricultural vehicles, it is safe to use on any surface of your tractor, even during the warm season. It combines an efficient cleaning action with an anti-static and shiny finish. Ideal for the washing of the vehicles after every treatment with SCHUTZ BARRIERE. Formulated with highly biodegradable materials. Dilute the product to 3-5% with water and apply with a sprayer.
